Projects

Vidstream video streaming web app <https://vidstream.vercel.app>

Created vidstream ,a full-stack video streaming app using ReactJS, NodeJS, Apollo Client and MongoDB that enables free Movie and TV show viewing. Implemented a performant and scalable backend with Express, GraphQL, and Prisma while integrating external APIs like TMD and Clerk. Deployed on Vercel with CI/CD.

Vizit guests management web app <https://viizit.onrender.com>

Built vizit, a guest management CMS using EJS, Express, SQLite and JS(Vanilla) enabling guest creation and RSVP tracking for events and occasions. Integrated Cloudinary for image uploads. Deployed on Render with CI/CD.
